Holmesglen Institute Update

Holmesglen are helping to bring an education theme park to life!

You can experience your future career at an immersive new "edutainment" theme park in Melbourne called Dreamcity.

Through practical activities such as career pods and virtual reality (360-degree learning), primary and secondary school students have the chance to engage with a range of innovative career options.

On track to open its full concept in mid-2019, Dreamcity consists of a range of activities including; TV and radio studio, science lab, hospital nursery and operating theatre, firefighting, tech lab and cultural centre. This is a first of its kind in Australia!

For more information, visit:

www.dreamcity.com.au

Student Taster Days

Holmesglen are offering year 9 – 12 students a 'taste' of various study areas.

These sessions are a great opportunity to get hands-on experience and explore your future career. Sessions are running at Chadstone, Moorabbin and Waverley campuses this October and areas include; beauty services, bricklaying, fitness, graphic design, plastering, interior design, printing, roof tiling, science and stonemasonry.

Please note, similar to school excursions, student taster days will require school group bookings for teacher supervision.

To view sessions and register visit:

<https://holmesglen.edu.au/studenttasters/>

Collarts Update

Collarts Welcomes Interior Design & Certificate III in Screen & Media

Collarts is now offering a Bachelor of Arts (Interior Design) and Certificate III in Screen & Media for VETIS Students.

The Bachelor of Arts (Interior Design) is ideal for students wanting to work as a Residential or Commercial Interior Designer covering spatial design, creative management, communication and business.

To find out more visit:

<http://collarts.edu.au/interior-design-diploma-and-bachelor-degree/>

The Certificate III in Screen & Media is for students in Year 11 and 12 and contributes to your ATAR score. This course involves creating video content, websites, logo designs, and GIFS. It is a pathway into Collarts' Diploma and Bachelor Degree in Content Creation. Content Creation is for designers and creators for the media, arts, music, fashion and other creative industries.

<http://collarts.edu.au/content-creation-production-diploma-bachelor-degree>

Federation University Folio & Audition Preparation

Fed Uni are giving applicants the opportunity to prepare for their portfolio or audition with workshops conducted in September. Folio preparation will be held in Ballarat, and the Audition Masterclasses held in Ballarat and Melbourne. For folio preparation visit:

<http://federation.edu.au/arts-academy/study/short-courses/art-and-design-workshops-folio-preparation>

For audition masterclass visit:

<http://federation.edu.au/arts-academy/study/short-courses/audition-masterclass>

Find Your 'Edge'

Have you visited 'Student Edge' yet? This site is dedicated to helping students navigate their way through student life in preparation for adulthood. It provides information, resources and advice on; finding jobs, saving money, managing finances and making well-informed career and life choices. To be inspired, motivated and supported during your studies and transition into work, visit <https://studentedge.org/>, they are one of the largest member-based organisations of high school, TAFE, VET and university students in Australia.

Career Focus Psychology

Psychologists study human behavior and the processes associated with how people think and feel. They can be involved in conducting research and/or provide treatment and counselling on a broad range of issues to reduce distress and psychological problems with their clients. They work with individuals and groups including children, adults, couples, families and organisations.

Psychologists:

- Construct tests to assess and predict mental and emotional states.
- Research psychological aspects of topics such as study motivation, teaching skills, occupational behavior, working conditions and organisational structures.
- Conduct therapeutic interviews and psychological tests then assess the results to identify the source of problems and determine treatment.
- Provide counselling.
- Evaluate the results of programs (treatment) aimed at improving personal and organisational effectiveness.
- Provide follow up services to individuals and groups for support and evaluation purposes.
- Contribute to government social policy development.
- Conduct academic research.

If you are interested in Psychology as a career pathway, it is beneficial if you; have an interest in people and human behavior, are able to solve problems, have an inquisitive mind, have an emotional maturity and empathy for others, are patient, perceptive and have good oral and written communication skills.

To gain entry into a Psychology degree you need to gain your VCE with English. To become qualified as a Psychologist and satisfy registration requirements, you usually have to complete a three-year Psychology bachelor degree or a single degree in Art, Social Science or Science degree with a major in Psychology. Following this you will need to complete an accredited postgraduate qualification (majoring in a specialisation of Psychology) as an Honours year or as a Graduate Diploma of Psychology. Then for provisional registration, you will be required to undertake either; two years of supervised experience with a registered Psychologist or a fifth year of study (Masters or Grad Dip) with one year of supervised experience. Please see the pathways diagram (1) on page 4 written by The Australian Psychological Society (APS) for a clear understanding of the registration requirements and study options.

To be eligible for registration as a Psychologist, you must study a course that is registered with the Australian Psychology Accreditation Council (APAC) <http://www.psychologycouncil.org.au/>. Students who complete the four-year sequence of study followed by the two-year internship will need to pass the National Psychology Exam in order to gain general registration. It is a legal requirement for graduates to be registered with the Psychology Board of Australia before being able to practice as a psychologist in any state in Australia. The Australian Psychological Society (APS) <https://www.psychology.org.au> is a peak body where you can also become a member.

There are a range of employment opportunities in the field of Psychology. Psychologists are employed by the government, privately run community welfare organisations, by hospitals and the Australian Defence Force. They are also employed in private practices and private health clinics.

Many graduates do not work as psychology specialists but are employed in positions where they can use the skills learnt through their psychology training. Research skills are particularly useful in market research, advertising, management or business consultancy. Other areas that provide employment for Psychologists include; social welfare, community work, human resource management, training, teaching and lecturing. Positions of interest could be work as; an Anthropologist, a Career Development Practitioner, Counsellor, Criminologist, Health Promotion Practitioner, Market Researcher, Marketing Officer, Rehabilitation Counsellor, Social Worker, Teacher – Early Childhood, Teacher – Special Education and Youth Worker.

Below is a list of single bachelor degrees with honours in Psychology and Psychological Science (only) in Victoria. The

Note:

- * The bachelor degree options such as; Arts, Health Science, Social Science offering Psychology majors are not included in the above list but you can visit VTAC for further information on these options.
- * Length of study period is based on minimum duration with a full time study load and the ATAR is based on the lowest selection rank.
- * RC – Range of criteria, NA – Not applicable.
- * As subjects and prerequisites can vary between institutions, it is necessary to contact your chosen institution for further information.

Pathways to registration as a psychologist

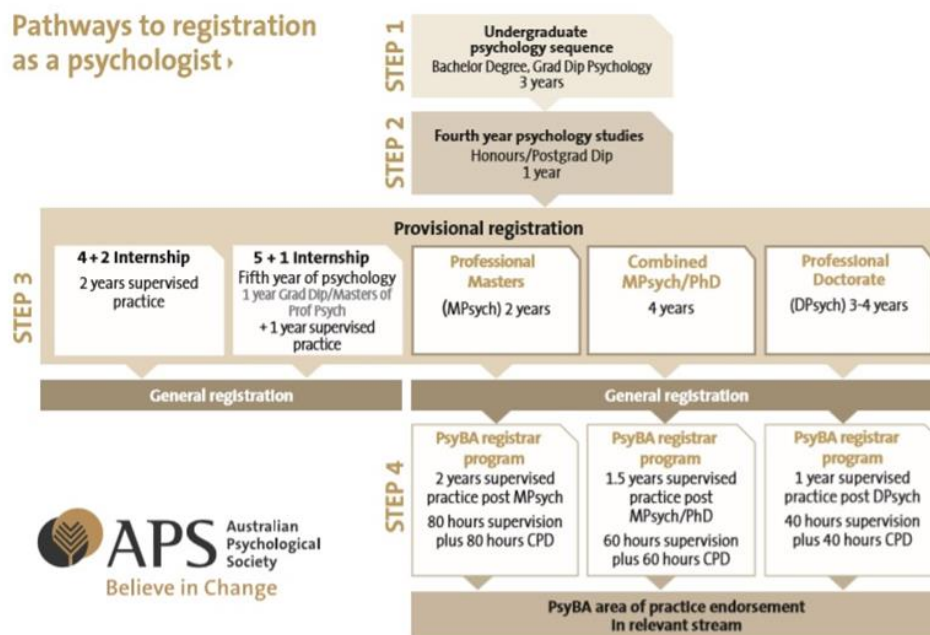

Diagram (1). Pathways to registration as a Psychologist (Australian Psychological Society – APS, 2018).

Career Profile - Psychology

Name: Natasha Morris

Current (or previous) position: Psychologist – Strathaird Primary School, Berwick Victoria.

1. Can you tell us a little bit about what course(s) you studied to become qualified in Psychology?

I completed;

- A Bachelor of Arts (Majoring in Psychology and Statistics) at Monash University
- Graduate Diploma of Psychology – Deakin University
- Masters of Psychology

2. Whilst completing your VCE, did you know what you wanted to do?

I wasn't completely sure. I was more certain of what I didn't want to do and I chose subjects that I enjoyed learning about. I was good at Psychology and I knew that I wanted to work in a very 'social' field, so I kept progressing in my studies and Psych is where I ended up!

3. You are currently working as a Psychologist at a school, have you always worked at schools?

No. During my Masters course I was required to do placement, which I did at Windemere Child and Family Services, working in Family Counselling. Once I completed my course, Windemere offered me a position first in Family Counselling and then in their 'Victims of Crime' department. I found the work with victims of crime very confronting, so when another position was available working with children who had additional needs, I changed departments. I commenced work as a Psychologist at Windemere's 'Biala Early Intervention Service'. I remained at Biala for approximately 10 years before I started private practice in Narre Warren working with children and families. Finally, I started part-time work as a Student Support Services Officer (SSSO) in conjunction with my private practice clients in 2009 before being asked by Strathaird Primary School to work as a School Psychologist employed by them.

4. What are the elements of Psychology work that you love and are there any aspects that challenge you?

I love the children and families who I work with. I especially like helping children to overcome issues that are problematic which negatively interfere with their development and/or functioning. It is very fulfilling witnessing children who are anxious, develop strategies and a better understanding of their emotions to effectively manage their anxiety.

(*Sources: Job Guide Victoria, VTAC).
